PROFESSIONAL SUMMARY

Third-year Information Technology student specializing in full-stack engineering and database development. Combines a strong foundation in backend architecture and UI/UX design with hands-on experience developing functional applications through collaborative projects and technical coursework, while actively learning cybersecurity to build secure and resilient systems.

EDUCATION

University of San Carlos *June 2024 — Present*
Bachelor of Science in Information Technology *Expected 2027*
Relevant Coursework: Data Structures and Algorithms, Linux Operating System, Network Security, Networking I & II, Information Management, Web Development, Systems Analysis and Design, Information Assurance and Security

PROJECTS & EXPERIENCE

Dimetrix — Power Outage Mapping & Analytics Platform Link to Live Website
Technologies: *Next.js, TypeScript, Node.js, PostgreSQL (Neon), Prisma, Leaflet, Auth.js, Tailwind CSS*

- Built a real-time geographic incident monitoring platform using Leaflet to track power outages, transformer failures, and scheduled brownouts across Metro Cebu.
- Engineered a crowdsourced reporting system with automated spam detection, community verification, and a protected admin dashboard for data moderation.
- Developed area-based analytics and status-tracking visualizations to identify affected regions and historical outage trends.

Noir Detailing — Auto Detailing Booking & VIP Subscription System Link to Live Website
Technologies: *Vue.js, Node.js, Express.js, MySQL, Prisma, Tailwind CSS, PayMongo API, Nodemailer*

- Developed a full-stack reservation platform supporting guest walk-ins and recurring VIP memberships with transaction invoicing.
- Implemented real-time studio bay allocation, capacity checking, and secure checkout via PayMongo to prevent scheduling conflicts.
- Configured automated HTML email workflows for booking confirmations, payment receipts, and appointment modifications.

DriveGo — Centralized Donation Drive & Verification Directory Link to Live Website
Technologies: *Next.js 15, TypeScript, Supabase, PostgreSQL, Prisma, Tailwind CSS*

- Designed a centralized platform for publishing and discovering donation campaigns, featuring complex filtering by category, urgency, and geographic location.
- Built a community veracity fact-checking system utilizing crowdsourced voting and admin verification badges to protect donors from fraud.
- Integrated server-side session management and secure user authentication via Supabase Auth.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, C#, C, Python, PHP, SQL, Bash, HTML5, CSS3
- **Databases & Backend:** PostgreSQL, MySQL, MS SQL Server, Neon, Supabase, Node.js, Express.js, .NET, Entity Framework Core, Prisma, REST APIs
- **Frameworks & Tools:** React, Next.js, Vue.js, React Native, Expo, Vite, Tailwind CSS, Docker,

Postman, Linux, Git, GitHub, Figma
- **Core Competencies:** Full-Stack Web Development, Backend Architecture, Relational Database Design, Data Analytics, UI/UX Design, Software Testing

AI-ASSISTED DEVELOPMENT & WORKFLOW

- **AI Development Tools:** Claude Code, OpenAI Codex, Google Antigravity, GitHub Copilot
- **Workflow:** AI-assisted coding, codebase analysis, debugging, refactoring, API development, documentation, and development workflow automation

EXTRACURRICULAR ACTIVITIES

Liaison Officer | Computer Information and Sciences Council (2026 – 2027)
- Helped manage external communications and secure tech company sponsorships for student events.

Member | Google Developer Groups on Campus (2025 – 2026)
- Participated in technical workshops to enhance development skills.

CERTIFICATIONS

- Cisco Networking Academy: Introduction to Networks (ITN)
- Cisco Networking Academy: Switching, Routing, and Wireless Essentials (SRWE)
- Accenture Skills To Succeed Academy
